Faris Rai Fadhil

BACKEND DEVELOPER

Experience

2021
PT. Manunggal Jaya Abadi
GRAPHIC DESIGNER

I was responsible for designing menu books, promotional materials, and preparing conceptual content. I also created engaging graphic designs to captivate the audience while transforming the concept plan into effective visuals.

2018
Infomedia (Internship)
BACK-END DEVELOPER

I undertook the essential tasks of constructing a MySQL database and executing queries through the Laravel framework in the context of modern web development. These responsibilities encompassed database schema design, relationship definition, and performance optimization. Leveraging Laravel's robust ORM capabilities, I streamlined database interactions, leading to efficient data retrieval and manipulation.

Certification

Golang Backend

Alterra (2023)

Verify this certificate.

About me

I am a graduate in Computer Engineering, with an interest in the field of Information Technology (IT). As a fresh graduate, I have knowledge of web and software development, and I also possess several design skills.
